

GTD

GTD designed for critical requirements has proven its reliability and efficiency in a wide range of application for more than 15 years.

Mechanism with an eccentric structure minimizes an on-off torque at high pressure, providing tight shut-off.

Carbon steel and stainless steel are standard materials for body and trim with a teflon seat.

Other special materials or particular treatment on trim and body are available as per the application and service.

Sealing structure

Teflon coated body with titanium disc
